President Obama Signs 3% Withholding Repeal!!!

On Monday, November 14th, one of ACEC's biggest legislative battles formally concluded as President Obama signed the bill repealing the 3% withholding mandate.

ACEC President/CEO David Raymond was on hand at the White House as the President put the final touch on a 6-year battle waged by ACEC and a large coalition of businesses and organizations nationwide.

ACEC was the first group to take a lead role in the repeal effort. Congratulations to David and the Staff at ACEC for a great victory. They were unrelenting in their efforts, and never let up on the pressure to get Congress to repeal this onerous law.

Thanks to all ACEC OKLAHOMA members who kept this in front of the Oklahoma Congressional Delegation. Your efforts played a key role in the repeal efforts!

Congress Finalizes F.Y. 2012 Transportation Spending Plan Senate Advances New Transportation Bill

House and Senate negotiators have reached a final agreement on a 2012 spending package for transportation and several other unrelated programs.

The bill provides \$41.54 billion for highways, a slight reduction from current funding levels but significantly higher than the \$27 billion proposed in an earlier House draft bill; \$10.61 billion for transit, \$311 million more than current funding; \$1.44 billion for Amtrak, including \$681 million for capital improvements; \$3.35 billion for the airport improvement program, a decrease of \$165 million; and \$500 million for TIGER multi-modal discretionary grants. No funds were provided for high speed rail development.

In the Senate, the Environment & Public Works Committee unanimously approved an ACEC-backed transportation bill.

The bill provides \$85.3 billion for highway programs over two years and expands the Transportation Infrastructure Finance & Innovation (TIFIA) program from \$122 million to \$1 billion per year, significantly increasing federal credit assistance to leverage project financing.

The bill, *Moving Ahead for Progress in the 21st Century (MAP-21)*, includes many ACEC policy priorities, such as accelerated project decision deadlines, elimination of duplicative reviews, expansion of category exclusions from environmental review, and early property acquisition.
